

DRUMS & HARDWARE

Signature Series "Special Edition"

The Signature Series by Sonor is still setting standards with reference to sound and craftsmanship. All the innovative construction, know how, and

experience that was gained in the past years of drum manufacture has been put into the development of the new Signature Series "Special Edition".

Check out the features of this new drum series:

- all drum mounts are isolated from the drum shell by the patented Sonor Hilite insulation system for improved sound projection
- basic material of the drum shells is select maple
- all tom toms and floor toms are equipped with seamless "mega hoops"

- the unique "Bubinga" wood is finished with high gloss lacquer

The Signature Series "Special Edition" is offered in combination with Protec hardware. This is made from special lightweight alloy with high stability but low weight. Please add "SE" to the Signature item number when ordering, e.g. HLG 22 RH now: HLG 22 RH-SE

Symphony Snare Drums with brass shells

Sonor is offering two new snare drums that comply with the highest demands regarding quality of sound and design. The brass shells, available in 7 1/4" and 5 3/4" depth offer outstanding projection due to their characteristic vibration. These snare drums are ideal for demanding drummers who seek the best for their performance.
